Item 16: Management's Discussion and Analysis or Plan of Operation

A. Plan of Operation for the next 12 months

It is anticipated that the following will take place:

The Company will continue to service and maintain its' current clients while actively marketing to find new clients. The Company will market its services in print, online and at events, along with all social media and work of mouth networking and marketing. The key to having multiple products and services to offer is the Company hopes to get a client started using one of their services and then introduce some or all of the other services at a discount once they have developed a comfort level with the company and the overall quality of the products and services.

We are also seeking out strategic partnerships or acquisitions that will support and enhance our product and service offerings and brands. We will be seeking funding revenue sources which support our need for approximately \$500,000 to expand our sales and marketing team while carrying more inventory and accounts receivables as the company grows.

Trends driving our business model

The overall trend in printing, packaging, product placement, marketing and consulting is to use fewer companies for more services so the client can limit the number of project teams and employees are required to fulfill their needs. Our economy of scales shared resources approach and team allows us to help our clients reduce their overall expenses by allowing us to service them in more than one area of their business. We are also printing more in-house and will continue to head in that direction as long as the positive results continue. If we are able to bring enough business in-house we will look into expanding and enhancing our in-house machines and equipment.

B. Management's Discussion and Analysis of Financial Condition and Results of Operations
