

Company Description

We are the US headquarters of a dynamic, global company, founded and based in Australia. All of our global divisions work together on interdependent teams, engineering and designing new soundscaping materials and surface design strategies, all while reusing and recycling materials to divert them from landfills and oceans. Our approach is not to deliver products, but to partner with designers to deliver the best possible experiences within the built environment, made using the best possible processes for the planet.

Summer Internship Program

This is an 8 -10 week program, and is available to incoming college seniors, graduate students and recent graduates. 15-25 hours per week.
