

MECHANICAL ENGINEER (Paid Intern/Part-Time)

DeviceDev Consulting, Inc. is seeking a candidate to assist with design, prototyping, and engineering tasks out of mHUB Chicago for Fall '21. Competitive pay based on experience.

Who is this post for?

This is a part time hourly or contract paid position for a new grad or a talented engineering student. Workload is subject to vary by week and the work schedule is flexible.

Is this you?

If you are a self-motivated individual who is looking for engineering product design development and hands-on experience, this position is a great opportunity for you.

Are you able to grasp concepts quickly and find a way to embody them? Are you creative and organized? Are you an "idea" person who would like to challenge themselves in a highly creative field? If the answer is "yes" to all of them then this might be a good fit for you.

What do we do?

DeviceDev Consulting, Inc. is a product development and innovation house located out of mHUB Chicago. We work on unique and new product development projects with startups and Fortune 500 companies. We love a good challenge. Industries that we work in include oil, gas, chemical, medical device, and IoT consumer electronics.

Your tasks include but are not limited to:

Research, design, fabrication, testing, and final execution from concept to completion while working collaboratively with staff and clients.

You must be a:

- Hard worker who is able to take action (willing to experiment).
- Positive attitude person who is willing to help.
- "Hands on" and crafty.

Candidates should rate their skill and experience level for (*required*):

- 3D CAD. (Fusion 360 or Solidworks)
- Engineering analysis.
- Fabrication (working with their hands using basic power tools.)

****Please note that responsibilities for this role will grow based on your capabilities.***
