

# Shannon Line Bending Table

Machine Purpose: Localized heating of plastic for the purposes of bending plastic parts

Safety: **Must wear safety glasses while operating machine.** Beware of hot plastic and elements  
**This machine has no built-in safety system.**

Materials: Plastics

Machine Specs: 48" area of heating, up to 4 elements,

Limitations: 48"x1" max dimensions

Accessories: Bending Table

Instruction Required: No – Help Session upon request. If adjustment to machine

Operations: To utilize turn on heating element via the green switch on the front face of the machine. Turn dial to desired heat setting (lower number thinner material). Place bend center line over heating element and wait until plastic has softened enough to bend. For thicker materials it is recommended to flip material over and heat from the opposite side for heat to absorb into stock evenly and not burn material. Once material is softened bend to desired angle or use bending table. Hold in place until material has cooled.
