CHE Training Programs and Materials

Development of the Community Health Evangelism (CHE) program requires three major training elements: the training team, the local committees, and the CHE volunteers. The initial trainings (Vision Seminar, TOTs, and Awareness Seminar) are facilitated by a training team outside of the local area. The remaining trainings (Committee, CHE Volunteer, and CHE Bible Study Growth Groups) are done within the community by community members. To have a sustainable program, it must be owned by the people and built on local initiative. We have developed standard training courses and lesson plans for each of these elements:

Vision Seminar Training

Purpose: To introduce LifeWind and CHE into a new country

Trainers: Area Coordinator and CHE Facilitator

Participants: Leaders from Christian organizations

Materials: Vision Seminar Training

A conference is held to introduce LifeWind and CHE concepts to individuals and the leaders of Christian organizations in a country. It is held as the first event for LifeWind to create awareness and interest in CHE. There will prayerfully arise from this conference several key leaders from different organizations who have in interest in cooperating with LifeWind as well as other organizations to start a CHE program. The training content is three days in duration and uses many of the lessons, which are presented in the Training of Trainers series noted below.

After several LifeWind projects are functioning and a number of Christian organizations are using CHE, there is sometimes a need to hold this seminar for leaders of the organizations who are using CHE. The purpose is to help them understand CHE and how it is working in their area of responsibility. This seminar is then taught by the trainers who are leading the three-phase Training of Trainers in the country.

Training of Trainers (TOT) Three-Phase Program and Materials

Purpose: To equip trainers for implementing CHE in a local area.

Trainers: Initial training done by the Area Coordinator and CHE Facilitator; subsequent training is done by LifeWind trainers who have successful CHE projects.

Participants: People who will implement CHE programs and become trainers of CHEs and committees.

Materials: Three TOT Manuals and Lesson Plans for Trainers

A three-phase training program was developed to instruct the training team. This three-phase training is necessary to establish a common foundation so all trainers will have the same frame of reference. Also, the trainers can begin a program based on experience and knowledge gained from previous projects.

The Area Coordinator will be the person who initially leads these trainings. Once successful programs are established, persons from these programs may lead the trainers' seminar for other Christian organizations.

The training process is divided into three phases with several months between each phase in order for trainees to practice what they have learned. The recommended time between Phase I and Phase II is 6-9 months and 4-9 months between Phase II and Phase III.

Phase I – Focuses on development philosophy and how to understand and start a CHE program. Spiritually, we include an emphasis on evangelism.

Phase II – Focuses on developing teaching materials, methods, and curriculum. Spiritually, we emphasize follow-up through the use of follow-up picture booklets. This content also acts as a review of the basic messages.

Phase III – Focuses on evaluation, project expansion/multiplication, and project management. Spiritually, we focus on discipleship.

Awareness Seminar

- Purpose:** To create awareness and understanding of CHE at the local community level.
Trainers: Trainers who have been through TOT I.
Participants: People in the community.
Materials: Entering the Community – Awareness Seminar

It is critical the people in a community begin to understand a CHE program before they make a commitment to become involved. The better the community understands CHE, the better probability there is of a successful project.

Potential communities are entered by talking about CHE as a wholistic approach to development. During this time, it is important to have a structured time whereby the people are given an opportunity to express and explore what they know about their community and what is happening in it as well as learn about CHE. This happens in an Entering the Community – Awareness Seminar.

The purpose of the Awareness Seminar is to create awareness for development in order to find ripe communities that are ready to do something by starting a CHE program. When ripe communities have been identified, they then will have a good understanding of what their community is currently doing and the communities' feelings about themselves.

The trainer is the person who uses these lesson plans found in the Awareness Seminar manual. This meeting is held in an area prior to the committee or CHEs being chosen or trained. There are two different Awareness Seminars, one for Christian areas and one for non-Christian areas that may be hostile to the Gospel. They vary from seven to ten sessions of three hours duration.

Committee Training and Materials

- Purpose:** To train the local committee members in CHE concepts, their job responsibilities, including how to choose CHE volunteers.
Trainers: Trainers who have been through TOT I and TOT II.
Participants: Local people chosen to be committee members.
Materials: Committee Training

A six-day training curriculum has been developed to train village committees. This consists of three to four hours per day, generally one to two days per week until the six days are completed. We discovered when we trained the committee first, the members began to take more responsibility and leadership and chose better people to be trained as CHEs.

The committee training materials are based on the trainers' Phase I training. Lesson plans are found in the Committee Training lesson plan manual. The trainers teach the seminar at the local level after they have completed TOT II. The materials emphasize the following: Understanding Community, Comparing Relief and Development, CHE Program Description, The Roles and Attitudes of a Committee, The Roles and Attitudes of a CHE, Step Planning, and various spiritual lessons, depending upon the spiritual maturity of the group.

CHE Volunteer Training and Materials

- Purpose:** To train local villagers in physical and spiritual topics.
Trainers: Trainers who have completed TOT I and TOT II.
Participants: Local villagers chosen to be CHEs.
Materials: Two CHE Training Manuals and various CHE Lesson Plans (physical and spiritual topics chosen by the community)

The prime training target is the CHE. This training is carried out by the trainers after they have completed TOT II and they have trained the committee members who then have chosen the CHEs. The CHE trainees generally walk to a central point in their area two to three days a week for 40-50 days. Each day they receive one physical and one spiritual subject. They then put into practice what they have learned as they visit in neighbors' homes. After the initial training is completed, the CHEs receive three days of additional training monthly for the next 12 months. Normally the training program is begun by introducing the trainees to the following topics:

Program Structure
Standards of Performance
Surveying (they then do in their area)
Mapping (they then do in their area)
Home-Visiting
Students' Worldview of Health

In regard to what physical topics are taught first, second, or third, it is critical that the community identify those physical problems that are important to them. This is found by using the "Road to Health" exercise. The problems identified by the community of most importance to them are what are taught first.

The lessons on diseases are presented in the following sequence with a lesson plan for each of the following:

- The cause of the disease
- How to treat the disease at home
- How to recognize the symptoms for professional medical help
- How to prevent the disease

In regard to spiritual topics there is a set sequence for teaching which includes:

- Ready and Willing Witnesses
- Sharing the Picture Book I, II, III, IV
- New Life in Christ
- Using the New Life in Christ Book
- Experiencing God's Love and Forgiveness
- How to Use the Confession Follow-Up Book
- Christian Growth
- How to Use the Christian Growth Book
- How to be Filled with the Holy Spirit
- Using the Christian Life Book
- How to Walk in the Spirit
- Using the Walking with Christ Book
- Time Alone with God
- Prayer
- Growth Groups

CHE Acts Bible Study Growth Group Series

Purpose: To equip CHEs to lead their own Bible study groups.

Trainers: Initially trainers and then CHEs.

Participants: Initially CHEs and then villagers.

Materials: CHE Acts Bible Study

The CHEs should have been participants in a Growth Group while they were undergoing CHE training. The intent is that the CHEs will lead their own Growth Group as part of their spiritual outreach. From their groups should come leaders who will lead more Growth Groups.

There are 53 lesson plans found in Acts Bible Study, which the trainer first uses with the CHE trainees, as they are part of a trainer's Growth Group. The CHE then uses the same lesson plans for his/her own Growth Group.

Facilitating Learning and Using the CHE Lesson Plans

The purpose of Community Health Evangelism (CHE) is to transform individual lives physically and spiritually in local communities by meeting people at their point of need. These transformed individuals are then involved in transforming their neighbors, thereby, transforming their community from the inside out. The goal is to prevent disease as we promote good health as people learn how to live the abundant Christian life. The beginning point for this process is education.

The emphasis is on how one person combines a physical and spiritual ministry. They are involved in helping people with their physical health problems, such as worms or malaria, as well as how they can come to know Christ as their personal Savior and then grow in their new faith.

The CHE lesson plans provide the materials a trainer uses in preparing the local people (CHEs) to do the actual work. Also included are lessons for the committee members who will give leadership and supervise the work in their community.

A full explanation of the CHE ministry is found in the book Multiplying Light and Truth through Community Health Evangelism by Stan Rowland, published by Evangel Press, Nairobi, Kenya. This can be purchased from the address noted on the back of the manual. Also, a seminar Training of Trainers (TOT) is offered by the same organization.

Learning Approach (LePSAS)

The French word "facile" means easy. A facilitator is one who makes learning easy. The intent of this learning approach is to make learning easy for the CHEs. Therefore, this learning approach is very participatory and focuses on the LEARNER, not the teacher.

The process begins by involving the student in the learning process through skits, songs, and pictures, which are called "**starters.**" They are used to start discussion on the topic under study. They pose a problem without giving any answer at the very start of the class. In most lessons, the "starter" is a two to three minute drama that poses a problem related to the topic to be discussed. Sometimes, a problem posing picture is also used.

The facilitator, or leader, is there to draw out as much information as the individuals in the group have. Only then does the facilitator give input or knowledge that does not come from the trainee. The facilitator helps to facilitate learning while playing an active role. As the class progresses, many times the larger group is broken into smaller groups for discussion of specific questions. Then each group reports back what they have found (observed).

The technique we use to foster this type of learning is described in an acronym **LePSAS**:

Le = Learner-Centered means we:

- Start where learners are.
- Take time for greetings.
- Take time to find out if they are comfortable in mind and body.
- The teacher uses learner's name ("Anna says ____").
- The chairs are set up in a circle so all participants can see one another (eye contact).
- All participants, including the teacher, are seated and at eye level with each other. (The teacher is not elevated.)
- The teacher repeats the learner's statements to make sure he understands what is being said and to make sure the whole class hears it. ("Anna says ____").
- Answers are written on newsprint so they can be copied later.
- The facilitator has an assistant who writes the answers on newsprint. This is done so he can fully participate in the teaching and not be standing, thus attention is on the learner, not the facilitator.
- Everyone contributes something to every discussion if possible.
- If questions or problems are brought up by the class they are often referred back to the learners for "buzzing" in twos or threes or in small groups.
- This encourages the group to think and to share their personal ideas.

P = Problem-Posing involves in presenting a problem to open the teaching time and get people thinking and talking.

- This is done by using a story, sketch, or skit which clearly presents one single, specific, solvable problem for each lesson.
- It poses or presents a single problem in a simple, clear, stimulating way.
- That presentation is a "starter" for the thinking process and leads into discussion.

A good Starter does the following:

- It poses a problem.
- It reveals or sharpens one's understanding of a problem.
- It stimulates the thinking process.

Why use a Starter?

- We use it as a guideline to discussion.
- It gets one's attention.
- It stimulates thinking in a group.
- It helps to make an image real.
- It helps to focus on one problem.
- It helps analyze the cause of the problem.

What makes a good Starter?

- It is short, clear, and simple.
 - It poses one problem at a time.
 - It shows a real life situation in a given community.
 - It stimulates discussion built on the experience and knowledge of the group members.
 - It should be true to the culture.
 - It calls for action by revealing a real need.
 - It should not give the solution.
 - It gets people involved.
 - It should be a solvable problem.
- After presenting a starter, the discussion is encouraged by using six special questions:
1. What things or people did you See? (In the "starter")
 2. What was Happening? (What was the specific problem posed?)
 3. Does this happen in Our place?
 4. Why does it happen?
 5. What can we Do about it?
 6. What are you going to do about it? (This question is optional but it is excellent for getting specific personal application.)
- With the help of these five questions, the starter has SHOWD us the way to solving the problem. Not all of the questions are asked every time.

S = Self-Discovery is essential to good learning:

- The learner discovers self-worth when he/she is taken seriously by the teacher and the other learners.
- Through dialogue (conversation or the inductive method), the learner discovers within her/his own thinking a good part of the answer to the problem.
- A good lesson will lead to the learner exclaiming "Ahah!" "I see!"
- All people have some knowledge. Therefore, we want to build on what they already know.
- Most of the desired knowledge will come from the group and usually from many different individuals. No one person has all the answers.
- Incorrect answers are made more "acceptable" by the facilitator's re-phrasing the question, or by asking what the group thinks. The right answer will normally come from the group itself so the facilitator does not have to always correct negative or wrong answers.

A = Action-Oriented: Without action, learning is only "head" knowledge.

- "Good teaching is helping people learn to do something."
- That "something" is to solve the specific problem which was posed in the lesson.
- The lesson is not completed until learners have made plans for acting on that solution (Who? Where? When? How?)

S = Spirit-Guided: Without the guidance of the Holy Spirit we can fall into humanistic teaching.

- All teaching of spiritual truth is effective only through the enabling of the Holy Spirit.
- We are seeking to teach God's eternal truth. The Holy Spirit is both author and interpreter of God's Word. As we depend on Him, He enables us to communicate God's truth with authority and clarity.
- The Holy Spirit changes lives. He alone can produce the change of heart (inward) which results in a permanent change of behavior (outward).
- The role of the facilitator is to be a sensitive and Spirit-controlled guide in the learning process. Since not all answers are correct, he/she must be able to lovingly and patiently correct, without destroying the person's self worth.

Beginning the Learning

Because the heart of CHE is an integrated approach to physical and spiritual ministry, it is important that all trainers teach both physical and spiritual topics and not just their specialty. We want the CHEs to be able to share both physical and spiritual truths with their neighbors.

If the trainer only shares on his topic of expertise he is modeling that it is okay for the CHE to do this also, this is not what we want to model. The heart of CHE and an integrated approach to ministry is one person being able and willing to share both physical and spiritual truths with others.

It is important to teach one physical and one spiritual session each day and not spend the whole training time only on a physical topic which reduces the impact of an integrated approach. It is good to vary what you teach first each day; i.e. one day start with a physical topic and then another day start with a spiritual topic. This keeps people from only coming at the time when the topic that has the most interest to them is being taught.

Many of the topics are covered in multiple sessions. Each lesson plan is one hour duration. It does not matter if it takes more or less time than is noted. Take whatever time is needed for the trainees to fully understand and be able to put into practice what they have learned. It is far better to teach fewer topics that the trainees know well then on many that they cannot fully put into practice.

Format of the Lesson Plans

There are three sections in the manual: physical, spiritual, and committee. The spiritual lessons for the committee training are found in the spiritual section so as not to duplicate plans.

It is critical that the facilitator spends time in preparing for each lesson to fully understand it and to modify it as needed for their situation. They also need to gather the materials listed.

The *Lesson Title*, *Time*, *Objectives*, and the *Overview for Trainers* are given at the top of each lesson. At the end of each plan are found the *Attitudes* and *Skills* we desire the student to have as well as how we *Evaluate* the progress of the student and the *Materials* needed for the class.

The format for each lesson plan is broken into two columns. The first column gives the *Method* we use. The second column has the content or *Knowledge* we want the student to know. The center gives some indication of the time for each section in the lesson plan.

The facilitator first looks at the method column to see what question they are to ask or what method they are to use to get at the content found in the right-hand, knowledge column. They then attempt to draw as much content from the group as possible prior to giving any of the information from the knowledge column. It is not necessary to bring out everything that is found under the knowledge column.

There is a starter beginning each lesson. Make sure, if a drama is used, that the players fully understand their part so they begin the topic on the correct foundation. The words **SHOWD** is at the end of each starter to remind you what questions are to be asked and their sequence (see above *P – Problem Posing*).

The last portion of teaching in some of the physical lessons is a spiritual analogy. This section draws a spiritual teaching from the physical topic which has been under study. Many times there is a Bible verse related to the physical lesson as well.

Health Teaching Pictures and Picture Booklets

Health Teaching Pictures are available for particular lessons. The pictures are too small to be used in a group size over 10 people. You may need to have them redrawn to a larger size. Also you may want to make them culturally appropriate for your area. It is good if the pictures are redrawn on plastic in order that they will last when used outside or get wet.

There are Picture booklets available for most of the physical topics. There is also a series of seven used for spiritual follow-up of new believers. These picture booklets are intended to serve as a summary of the teaching which has been done with the CHEs, as well as provide a tool to use during home-visits. The picture booklets help to ensure that correct information is taught. They also give confidence to the CHE in his teaching. The books are generally used one on one with the CHE and their neighbor.

An explanation of the physical picture book:

- The cover page has a problem-posing picture which can be used by the CHE to begin discussion in the home.
- The next page deals with the cause of the problem. The man who is holding his chin with his hand is asking a question. What is causing this problem?
- The next section covers treatment in the home. A small hut designates a home situation.
- The small building with a cross on it designates the section telling when a person needs to go to a clinic for treatment.
- The next pages deal with prevention of the problem. The fence in-between a healthy person and a sick person on a mat signifies prevention.

An explanation of the spiritual picture book:

- A Bible verse is given which the trainee is to look up. The trainers ask the trainee the question listed under that verse.
- The answers are given in the back of the booklet.
- After the first book, each book begins with a review of the previous lessons.

To teach CHEs how to use the booklet, follow this sequence:

- The Trainer demonstrates how to use the booklet from beginning to end. This is a separate lesson after the session on the topic has been completed.
- The CHEs then practice in pairs using the booklet in class.
- Divide the CHEs into small groups to practice under supervision.
- Send the CHEs out to practice sharing the booklet three to five times. At the next session, the CHEs then report back their experiences and any problems they found.

There are also picture booklets with pictures, but no words. They are for you to add the language of the people to the books so that they can be used in your project.

We pray this information will be helpful for transforming lives in the local community. Those transformed lives will see others transformed, thereby transforming their community.

MALARIA I – CAUSE

Date: 11/89

(1 HOUR)

- OBJECTIVES:**
1. Participants will understand the cause of malaria.
 2. Participants will teach others on the cause of malaria.
 3. Participants will recognize the traditional beliefs about malaria.

OVERVIEW FOR TRAINERS: This is the first in the series about malaria.

METHOD	TIME	KNOWLEDGE
<p>Role Play:</p> <p>A person acting like a mosquito bites a person who is apparently sick with malaria (shivering, joint pain, fever, etc.) Later the same mosquito bites a healthy person and this person starts to develop symptoms. (You may want to say this is some days later when the second person gets sick).</p> <p style="text-align: center;">OR</p> <p>Teaching Picture (rather than role play)</p> <p>Use picture of a boy with fever, standing water and mosquitoes.</p>	10"	
<p>----SHOWD questions----</p> <p>S = What do you <u>S</u>ee? H = What is <u>H</u>appening? O = Does this happen in <u>O</u>ur place? W = <u>W</u>hy does this happen? D = What will we <u>D</u>o about it?</p>		
<p>I. Ask them to discuss traditional beliefs about causes of malaria. List their answers. (You may not want to write these all down as it takes up a lot of class time.) Strike out those that there is disagreement over. (Go over them one by one.) As you discuss the list, help them understand why some of their traditional beliefs are wrong or that they don't go far enough.</p> <p>Find out, before teaching, what the traditional beliefs are in your area.</p>	15"	<p>I. <u>Traditional Beliefs</u></p> <ol style="list-style-type: none"> A. Mandazies cause malaria. B. Sugar causes malaria. C. Malaria is something you can vomit up. D. Kimbo (shortening) causes malaria. E. Walking in the rain causes malaria F. Food that is not cooked well causes malaria.

This lesson is part of an extensive series created by LifeWind International for use in Community Health Evangelism (CHE). In CHE, facilitators skilled in participatory learning methods enable communities to escape cycles of poverty and live as followers of Jesus. For information about CHE and how you can be trained as a facilitator, go to communityhealthevangelism.org, or contact [LifeWind International](#).

MALARIA I – CAUSE

METHOD	TIME	KNOWLEDGE
II. Explain what actually causes malaria and the role of the mosquito in the malaria cycle. You could do the above role-play after the discussion of traditional beliefs and before explaining the role of mosquito in the cause of malaria.	10"	II. <u>Role of Mosquito in Malaria Cycle</u> A. Mosquito bites a person with malaria and sucks the blood with the malaria germs. B. The mosquito now carries malaria and, C. 7 - 10 days later the mosquito bites a healthy person and gives this person the malaria germs. D. Now this person has malaria. E. Incubation period is about 10 days.
III. Discuss ways we cannot get malaria.	10"	III. <u>How Malaria Cannot be Contracted</u> A. By eating certain foods. B. By touching or being around another person with malaria. C. By drinking from the same cups or using the same bed or clothes from another person who has malaria.
IV. Explain only way we can get malaria.	5"	IV. <u>Only Way to Get Malaria</u> A. When bitten by a mosquito that has the malaria germs.
V. Give the spiritual analogy	10"	V. <u>Spiritual Analogy</u> A. Malaria is a disease caused by the introduction of germs into one's body through the bite of a mosquito. The symptoms of malaria are fever, chills and aching joints. These symptoms come and go in 48-hour cycles. Because of these cyclic symptoms, people often think they are over the disease before they actually are. B. In the Christian life, we tend to have periods where we feel we have overcome temptation to sin. We think that we've reached a level of maturity where Satan will now leave us alone. But beware, "Your enemy, the devil, prowls around like a roaring lion looking for someone to devour. Resist him, standing firm in the faith." I Peter 5:8a

MALARIA I - CAUSE

ATTITUDE: Facilitator is aware and has a respect for people's traditional beliefs about the causes of malaria.

SKILL: Participant will be able to understand the cause of malaria; teach others on the cause of malaria; and recognize the traditional beliefs about malaria.

EVALUATION: Facilitators will know that participants have learned the content of this lesson when they observe them teaching others about the cause of malaria.

MATERIALS:

- Newsprint
- Marking pens
- Masking tape
- Teaching picture of boy with malaria

This lesson is used in: Physical - Malaria
